INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International	app	lication	No

PCT/US04/14735

Box No. I Basis of the	report					
1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.						
	sed on translations from the original language into the following language, guage of a translation furnished for the purposes of:					
internation	al search (under Rules 12.3 and 23.1(b))					
publication	of the international application (under Rule 12.4)					
internation	al preliminary examination (under Rules 55.2 and/or 55.3)					
furnished to the receivin	2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):					
the international	application as originally filed/furnished					
the description:						
pages <u>1-27</u>	as originally filed/furnished					
pages* NONE						
pages* NONE	received by this Authority on					
the claims:						
pages 28-33	as originally filed/furnished					
pages* NONE	as amended (together with any statement) under Article 19					
pages* NONE	received by this Authority on					
pages* NONE	received by this Authority on					
the drawings:						
pages 1-10	as originally filed/furnished					
pages* NONE	received by this Authority on					
pages* NONE	received by this Authority on					
a sequence listin	g and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.					
3. The amendments	s have resulted in the cancellation of:					
the descr	iption, pages NONE					
<u>=</u>	is, Nos NONE					
三	ings, sheets/figs NONE					
 3	ence listing (specify): NONE					
== :	(s) related to the sequence listing (specify): NONE					
	(a) volumes to the codynamic (about)).					
4. This report has be since they have be	en established as if (some of) the amendments annexed to this report and listed below had not been made, en considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).					
the descr	iption, pages					
==	is, Nos					
	ings, sheets/figs					
=						
-	ence listing (specify):					
any table	(s) related to the sequence listing (specify):					
* If item 4 applies, some	or all of those sheets may be marked "superseded."					

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US04/14735

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1. Statement					
Novelty (N)	Claims	NONE .	YES		
210.000 (2.9)	Claims		NO		
Inventive Step (IS)		NONE	YES		
	Claims	1-21	NO		
Industrial Applicability (IA)	Claims	1-21	YES		
		NONE	NO		
2. Citations and Explanations (Rule 70.7)			-		
Claims 1-21 lack novelty under PCT Article 33(2) as being anticipated by Labeille et al. (US 2002/0037342 A1). Labeille et al. disclose the production of a multi-enzyme product containing protease activity, along with other enzymes, by solid state fermentation of Aspergillus fungi on wheat bran. The enzyme(s) may be separated and collected (see paragraph 0082, for example), and/or the fermented wheat bran itself may be added to an animal feed (see paragraph 0159, for example). The product may be used in the production of wheat-based animal feeds for monogastric animals such as poultry and pigs (par. 0038). The product may be dried or frozen, i.e. dewatered. Regarding the instantly-claimed aspects of decreased dry matter, increased protein content and decreased fat content of the fermented substrate, these are considered inherent properties of the disclosed process. The instant claims do not provide details to differentiate the claimed process from that of the reference. Claims 1-21 meet the criteria set out in PCT Article 33(4), and thus possess industrial applicability because the subject matter claimed can be made or used in industry.
